Behold, the eye of the LORD is upon them that fear Him, upon them that hope in His mercy ... Psalm 33:18

This picture shows the inside of the eye. Did you know that the iris shows the color of your eye? The black part of your eye is called you pupil.

Expercise: Go into the bathroom when it is dark with your mama. Stand in front of the mirror. Tell your mama when you are ready. Watch your pupil in the mirror and say "Now!" Mama will turn out the light for a short time (3-5 seconds) and then she will turn it back on. What did your pupil do? Try it several more times until you are certain what the pupil does!

This picture shows how God has marvelously worked the eye so that its muscles will move this way and that way so you can look all around. Try it ! Quickly now — look up to the ceiling, now the floor, now a wall, now the opposite wall, now your fingers, now your toes! Did you see how fast you could do that? Isn't that amazing? God created your eye so that it will do many, many things, but you must take care of them !
